

B Corp Certification - Disclosure Questionnaire Documentation

Disclosure Questionnaire category: Biodiversity and/or Monoculture

Updated as of: 06/25/2025

Quatro Vientos is involved in activities that could affect local biodiversity, meaning that they are more likely to have significant impacts on the environment given its interference with the balance of local fauna and flora. Certified B Corps are required to make transparent their involvement in such practices.

Risk Review Committee Recommendations

Thanks for your transparency on this topic. Our existing standards require that companies in such an industry / with such a practice are required to make this issue transparent to ensure that stakeholders are aware. This disclosure, however, is not intended to imply a judgment against the company and does not imply that the company is violating the standards of B Corp Certification, as you are eligible to proceed with the certification and a high percentage of B Corps are required to have a disclosure on their profile. Given the size of your company, and therefore the overall scale of the potential impact of this issue, we have a standardized disclosure on the topic to ensure transparency and consistency with other companies.

In addition to this disclosure, recognizing the potential impact of this issue, we do nonetheless provide recommendations to companies to ensure that they are thoughtfully managing these topics. To that end, we recommend that the company take into extra consideration the following suggested actions as they continue to manage their impacts, if you have not done so already:

- Monitoring and assessing the impacts of the company's activities on biodiversity.
- Identifying locations of critical wildlife habitat for species at risk in the company's facilities and surroundings.
- Managing environmental impacts with measurable and time bound specific targets related to preserving or conserving biodiversity.
- Utilizing farming techniques (e.g. crop rotation, regenerative ag, etc.) to minimize the degradation of cultivated land.
- Adopting management policies or practices designed to minimize the use of pesticides/fertilizers.
- Benchmarking against others in its industry in terms of biodiversity impacts and/or how these impacts are managed.

While there is not an expectation of specific practices in place by the company at this time, these would be topics that would be asked should there be material complaints received through our complaints process, and may be further incorporated into our standards in the future as we continue to improve them. Please take them into consideration.

If you have specific practices related to this matter shared publicly through the company's website, such as a sustainability report, please share one link with us by July 1st 2025 and we can include it in the disclosure. Otherwise, we will proceed with the finalization of your disclosure report.

Sincerely,

B Lab's Risk Review Committee
